

YAHIR GONZALEZ

TECHNICAL OPERATIONS | PROCESS AUTOMATION | PRODUCT SYSTEMS

541-441-7817 | yahirg2021@gmail.com | linkedin.com/in/yahir-gonzalez-278130241

Technical operations and product systems operator with a computer science background, focused on building software that removes operational bottlenecks. Shipped 4 iOS apps end to end, built products used by thousands of users, and supported live operations serving 3,000+ active members across AI search, consumer health, and fitness.

EXPERIENCE

Virtual Pirates LLC / Rankett | Co-Founder, Technical Operations 2025 - Present

- Built Rankett, a white-label AI-search delivery platform for agencies, combining buyer-intent research, client dashboards, branded reporting, delivery tracking, and WordPress deployment in one operating system.
- Built and shipped 4 iOS apps under VRTL Pirates, owning the full stack from product requirements and UX through database design, authentication, APIs, payments, deployment, App Store release, support, and iteration.
- Built and coordinated a distributed remote delivery team while owning client communication, technical execution, workflow design, and quality control from intake through final delivery.

Lift ATX | Brand Partnerships & Operations Jan 2026 - Jul 2026

- Supported operations serving 3,000+ active members while owning partnership outreach, membership sales, advertising coordination, and day-to-day member experience.
- Helped drive 15% revenue growth through membership sales, partnership activity, and tighter execution across member, POS, and payment workflows.
- Rebuilt the merchandise pipeline end to end, from product selection and vendor coordination through inventory setup, merchandising, and in-gym sales execution.

Brotein / GymBro Health App | Co-Founder & Product Lead Feb 2025 - Present

- Built Brotein full stack from A to Z and shipped it to the Apple App Store, translating nutrition and anabolic-potential concepts into the product logic, database, user experience, and release pipeline.
- Grew the product to thousands of users and built a structured nutrition database spanning 90+ restaurants and tens of thousands of food items.
- Owned onboarding, CRM, user support, re-engagement, App Store operations, and feedback loops, using live user behavior and requests to drive product iteration.

Occam Advisors | Investment Analyst Intern May 2023 - Jan 2024

- Supported diligence across 7 pre-seed companies, analyzing markets, business models, competitive positioning, and company fundamentals to surface the highest-signal investment questions.
- Managed research and pipeline tracking across the 7-company portfolio, keeping diligence status, open questions, founder information, and next steps organized for internal review.
- Prepared decision materials and joined investor meetings in Washington, D.C. during final-check fundraising discussions, translating diligence into concise investor-facing takeaways.

Oregon State University | Data Support Analyst May 2022 - Sep 2022

- Completed dozens of high-sensitivity data support tasks requiring strict access control, accuracy, and documentation, where mishandling or exposure of institutional data carried meaningful risk.
- Investigated dataset discrepancies and tooling issues, validated records against source data, corrected errors, and translated technical fixes into clear next steps for faculty, staff, and research teams.
- Documented repeatable quality-control and support procedures for data validation, issue resolution, and handoff, improving consistency when nontechnical users worked with sensitive research data.

EDUCATION

Oregon State University | B.S. Computer Science, Minor in Economics June 2025

Ford Family Scholar | Honor Roll (3.5+ GPA) | Google Developers Student Group, Vice Lead
Oregon State Investment Group, Financial Sector Leader
