

YAHIR GONZALEZ

PRODUCT ENGINEERING | AI APPLICATIONS | PROCESS AUTOMATION

541-441-7817 | yahir@zelaznogrihay.com | zelaznogrihay.com

Product engineer building and scaling iOS, web, and AI products under Vrtl Pirates. Shipped 4 iOS apps, grew GymBro Health to thousands of users, and built Rankett for agency AI search workflows. Own product development from requirements and UX through backend systems, release, and iteration, with experience in investment research and operations serving 3,000+ active members.

EXPERIENCE

Vrtl Pirates | Product Engineer

Feb 2025 - Present

- Shipped 4 iOS apps end to end, owning requirements, UX, backend systems, authentication, APIs, payments, deployment, App Store releases, and ongoing iteration.
- Built and scaled GymBro Health to thousands of users, pairing AI food analysis for muscle building with a nutrition database spanning 90+ restaurants and tens of thousands of food items.
- Built Rankett, an AI search visibility platform for agencies, combining buyer-intent research, client dashboards, branded reporting, delivery tracking, and WordPress deployment.
- Building Orph (textorph.com), an iMessage health agent for conversational workout, nutrition, and supplement logging.
- Built and coordinated a distributed remote delivery team while owning client communication, workflows, quality control, onboarding, CRM, support, re-engagement, and feedback-driven product iteration.

Lift ATX | Brand Partnerships & Operations

Jan 2026 - Jul 2026

- Supported operations for 3,000+ members, managing partnerships, membership sales, advertising, and member experience.
- Helped drive 15% revenue growth through membership sales, partnerships, and improved POS and payment workflows.
- Rebuilt the merchandise pipeline, from vendor coordination and inventory setup through merchandising and in-gym sales.

Occam Advisors | Investment Intern

Jun 2023 - Aug 2023

- Supported diligence across 7 pre-seed companies, analyzing markets, business models, competitive positioning, and company fundamentals to surface the highest-signal investment questions.
- Managed research and pipeline tracking across the 7-company portfolio, keeping diligence status, open questions, founder information, and next steps organized for internal review.
- Prepared decision materials and joined investor meetings in Washington, D.C. during final-check fundraising discussions, translating diligence into concise investor-facing takeaways.

Oregon State Investment Group | Financial Sector Leader

Feb 2022 - Jan 2023

- Led financial-sector research and weekly market analysis to support investment decisions for the OSU Foundation portfolios.
- Prepared weekly finance-sector updates and presented investment insights to the full group.
- Trained and onboarded new members on stock-valuation tools, research frameworks, and investment analysis.

Oregon State University | Data Support Analyst

May 2022 - Sep 2022

- Completed dozens of high-sensitivity data support tasks requiring strict access control, accuracy, and documentation, where mishandling or exposure of institutional data carried meaningful risk.
- Investigated dataset discrepancies and tooling issues, validated records against source data, corrected errors, and translated technical fixes into clear next steps for faculty, staff, and research teams.
- Documented repeatable quality-control and support procedures for data validation, issue resolution, and handoff, improving consistency when nontechnical users worked with sensitive research data.

EDUCATION

Oregon State University | B.S. Computer Science, Minor in Economics

July 2025

Ford Family Scholar | Honor Roll (3.5+ GPA) | Google Developers Student Group, Vice Lead
